DAILY PUBLIC LEDGER-2898

MAYSVILLE, KY., TUESDAY, SEPTEMBER 17, 1912

ONE COPY-ONE CENT.

THESE FOURFLUSH DAYS.  
The shades of night had all but fell,  
Wooed to a really swell hotel.  
There came a stranger, travel stained,  
whose life-sized pocketbook contained  
Excelsior!

—Johnstown Democrat.

One morning came it was his mood  
Daily with some breakfast food;  
An appetite to satiate,  
A stress placed upon his plate  
Excelsior!

—Youngstown Telegram.

He met a girl upon the street,  
A classy damsel, plump and neat;  
Upon her figure he enthused;  
He did not know the damsel used  
Excelsior!

—Milwaukee Sentinel.

His wife discovered on his coat  
A strand of hair. She grasped her throat.  
Hold on, my dear, now do not fret,  
This is no hair, it is, you bet,  
Excelsior!

—Yonkers' Statesman.

He bought his wife a leather chair,  
Guaranteed to be stuffed with hair.  
But in two weeks it broke and split,  
And there was bulging from inside of it  
Excelsior!

### ORANGEBURG

Consolidated School Started  
Off Yesterday Under  
Most Gratifying  
Conditions

Enrollment of 111 Pupils and  
Two Transportation  
Wagons at Work

The new Consolidated School at Orangeburg, the second in Mason county, opened yesterday under the most auspicious circumstances.

The schoolhouses at Mt. Gilead, Dickson, Sedden and Plumville have been closed and abandoned as public schools, the scholars going to the Orangeburg Consolidated School, the second school of the kind in Mason county, Mayslick being the other one. Yesterday's enrollment totaled 111 pupils taught by the following teachers:

Principal—George H. Turnipseed. Assistants—Miss Mabel Butterfield, a graduate of Miami University, Oxford, Ohio, and Miss Minnie Tolle of this county.

The pleasing program ushering in the new school was very appropriate and highly enjoyable.

Rev. C. A. Corkwell of Mayslick opened the exercises with prayer and also made a helpful address, as did Miss Jessie O. Yancey, County Superintendent, who is again to be congratulated for establishing the second consolidated school in Mason county and the transportation method of hauling distant pupils to school.

Prof. Turnipseed, the principal, in taking charge of this enlarged school, stated in his welcome remarks that thirteen years ago he taught at Orangeburg and that he felt pleased and honored that he is now in charge of the consolidated system in the same place.

A more happy and delighted lot of children was never seen than those at Orangeburg yesterday. It is no longer the little lonesome school, but a fine gathering of three rooms full, three teachers, up-to-date condition, and, best of all, free wagons to haul the pupils to and from school.

It is not such a changed condition inspiring, alike to pupil, teacher and parent!

## In the Market For a WHEAT DRILL

Then Our "New Peoria" Is What You Want

It has perfect working discs, fitted with dust proof chilled bearings, single draw bars that will not gather trash, staggard spoke wheels with 7-inch hub and 3-inch tires, continuous rear bar with truss rod to support seat and keep drill from sagging, direct pressure in rear of disc; a feature we claim will make this drill work perfectly in any land suitable for sowing grain and where other drills cannot be operated. A seat in center of drill convenient to lever is also furnished. Drop in and let us show you what this drill can do, and furnish you with the names of a score of satisfied users. One feature of our drill that puts it in a class by itself and makes it superior to all other drills on the market is the "Peoria Disc Shoe." You won't find the disc shoe on any other press drill on earth, the Peoria people have that feature cinched and they are going to hang on to it. If you want to know why we can grow more wheat to the acre after this drill than any other with the same amount of grain sown, come in and let us explain to you the "New Peoria Disc Shoe Drill."

Brings the Highest Average Price  
Per Pound in Fifty Years

WASHINGTON, D. C., September 15th.—Figures of startling import, tending to show that the dissolution of the Tobacco Trust has helped the tobacco farmer by raising the price of tobacco will be issued soon by the Department of Agriculture.

The price of tobacco per pound for August, 1912, was approximately 11.7, according to an unofficial statement from the Department of Agriculture, the exact figures not being available. Except for the short crop years—1865, 1864 and 1863—this price was higher than the average price per pound that has

been paid for tobacco for any year since colonial times, when a planter could buy a wife for a few hundred pounds of his then new luxury.

A statement from the department just issued gives the tobacco acreage for 1912 as 1,194,200. Estimating the size of the crop upon its condition for September 1st, as compared with that for the corresponding date of 1911, the department predicts that 976,000,000 pounds will be produced this year. The largest crop yet produced was that of 1909, which passed the billion mark.

The crop for 1911 was 905,000,000 pounds, and there were 1,012,800 acres planted. The average price per pound for 1911 was 9.04 cents.

The average price has not reached 11 cents per pound before this year since 1865, when a crop of 178,355,000 pounds brought 11.8 cents. The two years preceding 1865 the price was 14.8 and 14.9 cents.

## THE CROWN JEWEL OF STATESMANSHIP.

Sincerity is the primary token of true patriotism and the one essential hall-mark of trustworthy statesmanship.

What makes great men great? The question is the theme of much complex reasoning. With many subtle refinements of analysis, historians, essayists and orators undertake to account for the strength of outstanding leaders in the nation's life. But for such of those leaders as remain, after their own generation has passed from action, supreme figures of patriotic history still, the explanation is not complex but very simple:

They were honest men—men of reality—men void of pretense.

Mark their genuineness, and the inner secret of their greatness is known.

Washington and Lincoln—even Hamilton and Jefferson—were not men of any singular genius. Contemporaries may be easily named equal to all of them in intellectual power, yet never rising for a moment to comparison with their might as leaders of men and molders of national destiny.

And the difference which has made a few great where many were small is at bottom only this—that when these few unapproached saints of patriotism said they were of the people, it was true; whereas the lesser brood, though professing unctuously the same single-minded zeal, ere long betrayed the selfish bias of their ambition, seeking glory, gain and power to fatten an individual vanity, Olympian in pretension but petty and stunting in effect.

It is sometimes said that in politics no man's motives ought to be questioned—that the seed of offensive personality in political discussion is sown when any public leader is accused of being dishonest in his professions of principles

purposes. But the personal inquiry that

rests on knowing whether men standing forth for political leadership are true men or not is offensive only to such as are unable to endure trial by this criterion. And there is no discrimination and discreet voting which does not apply that very criterion of sincerity as keenly and exactly as availingly knowledge will permit.

No matter what may be the claims of party allegiance or the appeal of political enunciations, the well-advised citizen will vote for none outside the boundaries of honest manhood.—The Continent.

Of course The Continent is referring to the base ambition of Theodore Roosevelt.

## TEDDY BEATS CHARLEY WHITE MOON.

The Colonel told the folks out in Montana on Saturday that he would not be a king if he could. He says he would greatly prefer to be President—indefinitely, of course, we presume. A modern king is a cross between a perpetual Vice President and a leader of the four hundred, says the Colonel. He knows a few of the breed and therefore is not inclined to tread in their footsteps.

All of this is very reassuring and we thank the distinguished gentleman heartily for setting at rest the fears of those of his fellow citizens who see in his third term ambition a menace of crown and sceptre. We have always regarded the Colonel as safe and sound on that proposition. Even if he could turn the trick, spring his coup d'état and take charge of affairs as Theodore I, we don't believe he would do it, for he would rather far be a live politician than a dead king.

As matters stand he is free to covet all over the landscape on private cars and special trains secured for him by his great and good friend Perkins and other great and good friends, and make enough noise to finance twenty ordinary campaigns. He enjoys the distinction of being the best advertised man in Christendom and there are other perquisites attached to his job of disturber-in-chief that appeal to him mightily.

No, Theodore has entirely too much knowledge of the temper of the American people to try any king business. But as a modern political dictator, unhampered by constitutions or traditions—well that's another matter—Portsmouth, (Va.) Star.

## Political Pickings

*Chicago News:* What a fine opening there is for a bull moose in Mexico!

*Detroit Free Press:* Kaiser William says his son will be the last of the Emperors. Another knock for the house of Roosevelt.

*Columbia State:* As we understand the situation, Colonel Roosevelt thinks there is considerable good in the root of all evil.

*Philadelphia Press:* All the Bull Moosers are not standing at Armageddon. As many of them as can are running for office.

*Columbia, S. C. State:* "I am the naked issue," shouts the Colonel. Will somebody kindly lend the gentleman a barrel.

*Knickerbocker Press:* The greatest concern of the Colonel on the color question these days is the color of Angel Perkin's money.

Deafness Cannot be Cured  
by local applications, as they cannot affect the

cure deafness and that is by constitutional remedies.  
Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a rumbling sound in the ear, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

## A WORD WITH WOMEN

### VALUABLE ADVICE FOR MAYSVILLE READERS

Many a woman endures with noble patience the daily misery of backache, pains about the hips, blue, nervous spells, dizziness and urinary disorders, hopeless of relief because she doesn't know what is the matter.

It is not true that every pain in the back or hips is trouble "peculiar to the sex." Often when the kidneys get congested and inflamed, such aches and pains follow.

You can tell it is kidney trouble if the secretions are dark colored, contain sediment; the passages are too frequent or scanty. Then help the weakened kidneys. Don't expect them to get well alone.

Doan's Kidney Pills have won the praise of thousands of women. They are endorsed at —— Read this Maysville woman's convincing statement:

Mrs. Sam Neal, 497 West Second street, Maysville, Ky., says: "Although I have never used Doan's Kidney Pills myself, I can recommend them. One of my family had a great deal of trouble from his back and kidneys. Doan's Kidney Pills made him entirely better and he always praises them."

## UNASSISTED TRIPLE PLAY

At San Francisco last Saturday first baseman William Rapp of the Portland Baseball Club of the Pacific Coast League, made a triple play unassisted in a game with Oakland. Oakland runners were on first and second bases. The batman hit a low liner towards first, and the base runner, thinking the ball could not be fielded, sprinted ahead. Rapp scooped up the ball with one hand before it touched the ground. He touched first base before the runner could get back, and then raced to second in time to get the third man.

## GAME WARDEN MAKES SCOOP

Catches Seiners in Robertson and Demands a Rigid Prosecution

Mt. Olivet Advance.

One day the early part of last week H. E. Porter, Game Warden of Nicholas county, W. J. Kenton and two other gentlemen came over to Robertson to fish in the North Fork near the Hook Jett bridge.

After making camp and fishing with pole and line for a while they were surprised to see a party of seiners coming up stream, a long net stretched and just scooping the fish. Mr. Porter was away from his party at the time but learned of what had happened on his return. Following the seiners, he caught up with them and they readily told him of their good luck, and gave him an informal introduction to three of their party.

Then Mr. Porter began to hunt some nearby resident to use as a witness, and failed. One of the residents gave the seining party a tip that Porter was a Warden. Then the fun started.

\*\*\*\*\*

The next chapter will be written in December as Mr. Porter stopped in Mt. Olivet on his return home and reported the matter to County Prosecutor Throckmorton and demanded that the case be brought to the attention of the next Grand Jury.

A majority of the residents along the North Fork in this county object to seining and have been wanting it stopped for some time, yet they refused to act as prosecuting witnesses. Farmers along the Fork in the Bridgeville vicinity have put a stop to seining.

## HAS CHANGED AS CANDIDATE

Woodrow Wilson's Speeches Now  
Those of Office Seeker.

Scattered among the platitudes of Dr. Wilson's speech of acceptance are some truths. None is more significant than this:

"We stand in the presence of an awakened nation, impatient of partisan make believe."

Following which he makes believe that he is telling the voters of the country his position on the campaign issues. No one has yet been able to determine from a reading of the speech precisely what that position is. Some slight enlightenment comes from time to time in his later utterances, like, for example, the declaration the other day that Tammany is to be safe from his assaults; but none of it is satisfying.

Dr. Wilson, in the preconvention days, was represented to the country as a scholarly gentleman, too lofty of mind to practice the wiles of the professional politician, too earnest in the cause of good government to be aught but frank and fearless in his expression, too unselfish to put private ambition above the public weal, too idealistic in character to truckle to the forces of evil in the nation.

But how singularly he has masked all of these qualities since William Jennings Bryan forced his nomination at Baltimore.

There is no difference, save in the purity of the English, between his speeches and the speeches of the professional office seeker of the worst period in American politics. He steps pussy footed over all the large questions of the day. He exhibits a suspiciously broad tolerance for all elements in the body politic, even the elements which, to nominate him, Bryan found it expedient to denounce by name in the convention. There is none of the rugged frankness of utterance that characterized his writings in the days before he was inoculated with the virus of political ambition. He is proving over apt as an advanced student of practical politics.

It is not a pleasant nor a heartening exhibition he makes of himself. The right minded citizen can feel nothing but sadness in contemplating a man of education and culture so intent upon partisan and personal victory that he sacrifices those ideals of truth and honesty for which he has always stood to fawn upon and honeyfuge the voters.

Dr. Wilson as a candidate is not in character with the Dr. Wilson that was pictured to us prior to the Baltimore convention. This "awakened nation, impatient of partisan make believe," detects the difference.

There have been a great many different theories about the cause of the noise we call thunder. Some savage nations think it is caused by the clouds knocking together in a storm and making a spark, like two pieces of flint, with a crackling sound at the same time.

Not long ago, when electricity first began to be understood, many persons believed that the lightning made a hole in the air as it passed along and that the rush of air to fill up this vacuum caused the noise just as it is caused by the air rushing back into the vacuum in a big cannon.

The more modern theory, based on some remarkable experiments with very fluffy cotton that was made damp, is that the intense heat of the electrical discharge instantly turns the surrounding vapor of the cloud into steam and causes an explosion as sudden and fierce as gunpowder. It is the number and diversity of these theories that makes the crackling sound we hear when the thunder is close to us, which would not be the case if the cause were the air rushing into a single vacuum, as that would make only one big bang, just like a cannon.

MILLBURY, MASS., September 15th.—Miss Della Torrey gave a party today in honor of her nephew, "Will" Taft. The President was 55 years old today, and he was the guest of honor. Mrs. Taft, Miss Helen Taft, and C. P. Taft, the President's brother, and Mrs. C. P. Taft were present.

"Aunt" Delia had plenty of apple pie such as the President was fond of when he went to school in Millbury, but there were many other things to accompany a perfectly good birthday party. The president went to church in the morning with Miss Torrey took her for a motor ride in the afternoon, and started back for Beverly with all the guests later in the day.

It became known here today that the President recently came to the rescue of the Unitarian Church of Millbury, with a substantial contribution. The money was sent through Miss Torrey and in his letter accompanying the check the President said he was glad to make the contribution, "just in memory of my mother."

It is stated on good authority that typhoid fever was epidemic among the 151 Adams county, Ohio, teachers, who held their 1912 Institute on board the steamer Steel City last summer, and that since their trip 27 cases of typhoid have resulted and two deaths have occurred.

The foul Ohio River water imbibed is directly charged with causing the epidemic.

Now since the recent floods in West Virginia the Ohio River has been in a very muddy state and the water is thought to be infected with all kinds of germs. In order to prevent any possible illness from drinking the water the captains of the steamboats plying between Cincinnati and Pittsburgh have been given orders by their companies to boil every drop of water that is used on the boats, either for drinking or cooking purposes. The water is purified through some process with steam.
